

DELTA L

Manual crack sensor

Product description

The DELTA L enables **precise manual monitoring of cracks** (opening, shear, out-of-plane displacement, angled).

Compact, robust and affordable, it offers high accuracy and is easy to use on all your construction sites.

- ✓ Manual operation
- ✓ Data entry in the application
- ✓ Wireless
- ✓ Button-cell battery

Technical specifications

MAIN FEATURES

Measurement types	Crack monitoring (<i>opening, shear movement and out-of-plane displacement</i>)
Dimensions	22 × 4.5 × 7 cm.
Weight	0.85 kg
Battery	LR44 button-cell battery – 1.5 V
Electronics	Digital readout

ACCURACY AND PERFORMANCE

Maximum range	14 cm
Resolution	0.01 mm

OPERATING CONDITIONS

Gauge mounting	Suitable for all surfaces
Installation	Adhesive mounting or hammer-in anchor
JC1 gauges	Stainless steel or polycarbonate (<i>crack-opening monitoring</i>)
JC2 gauges	Polycarbonate (<i>shear movement and out-of-plane displacement monitoring</i>)
